Winsor Pilates Weight Loss: A Fallacy?

Have you ever thought to undergo some methods to lose weight or you just don't care? Well, mine here is just simple speculations on the truth about Winsor Pilates weight loss.

As we approached the ever fast changing societies, many infomercials are advertising the new trend in fitness industry which is the Winsor Pilates weight loss workout. Because of those infomercials, the Winsor Pilates weight loss exercise becomes the most popular topic surrounding weight loss.

For everybody's information, the Winsor Pilates weight loss program is first designed by Mari Winsor for those who wanted to sculpt their bodies and to lose weight. Many claimed that the Winsor Pilates weight loss program really works. However, when we talk about the Winsor Pilates weight loss program that supposed to tone your body and help you get lean and shapely, we cannot deny the fact that there is really no such thing as a weight loss program like the Winsor Pilates weight loss workout that can totally shape your body. This fact is supported by the reason that the only way to burn fat and lose weight is to undergo methods with the use of good fat burning diet.

The truth about Winsor Pilates weight loss workout is also denied by most people because the Winsor Pilates accordingly is just a slow form of exercise and does not really burn fats.

Let us accept the fact which sometimes becomes a fallacy in the world of infomercials that many infomercials just present those claims that Winsor Pilates weight loss really works by presenting models and personalities that are really lean and shapely. With such perspective, the Winsor Pilates weight loss is therefore designed to look effective on the infomercials because everybody shown performing it is lean and shapely. Those infomercials about Winsor Pilates weight loss don't tell you that those particular personas were already lean and shapely before the Winsor Pilates weight loss was designed as a weight loss exercise. It therefore shows that those Winsor Pilates weight loss workout personalities did not attain their fat loss and weight loss by merely using the Winsor Pilates weight loss workout. Oh, what a fallacy! But even though that method works, let us bear in mind that it still remains a fallacy.

Pilates And Complete Body Fitness

To further support the claim that Winsor Pilates weight loss workout will not help you get any leaner and the Winsor Pilates weight loss workout will not help you in your weight loss efforts, some supporting opinions about Winsor Pilates weight loss workout is given. Accordingly, in most opinions I have researched, the Winsor Pilates weight loss workout is not really designed to lose weight but only to sculpt the muscles, especially the abdominal muscles. And to better gain a result, if someone is serious with losing weight, an additional fat burning diet is applied aside from the Winsor Pilates weight loss workout. Therefore it is understandable that the Winsor Pilates weight loss program must be coupled with healthy diet and good routines. Because of that the Winsor Pilates weight loss program designed some of the supporting kits for better results, such as the 3-D Training and Win-in-10-Meal Plan. So, if you are really interested to achieve great results on losing weight, you can try Winsor Pilates weight loss workout and at the same time couple it with a healthy diet and routine.

Winsor Pilates Basic Principles

If you are looking for some fitness program that will help you flatten your abs, shape and sculpt your body slim from top to bottom, Winsor Pilates basic principles to body conditioning can answer for you.

Before anything else, I would like to state that the Pilates fitness program is first developed by Joseph Pilates who had a lifetime interest in body conditioning in 1920s. His interest in physical fitness rooted from his strong determination to strengthen his body and improve his health after a sickly childhood. From that, Joseph formulated a distinct sequence of movements that worked the mind and muscle in harmony.

Oops, enough for history. Now, let's go to the core message of this article – Winsor Pilates basic principles. Winsor Pilates program focuses mainly on bodyweight which include exercises which stretch, strengthen, and tone all the muscles of the body, especially those of the core or abdominal and lower back regions. As such, the Winsor Pilates provide Winsor Pilates basic principles for those who are interested in such area. Among those Winsor Pilates basic principles are: Concentration; Control or Precision; Centering; Stabilizing; Breathing; Alignment; Fluidity; and Integration. Each Winsor Pilates basic principle has its own essential characteristic.

Concentration, as the first Winsor Pilates basic principle, is very important to attain a successful workout. With this Winsor Pilates basic principle, the awareness of the body will be enhanced due to the mind-body connection which results to conscious control of movement. The second Winsor Pilates basic principle, Control or precision, is not about intensity or multiple “reps” but it is more of descent form of snug, emphatic results. Centering, as the third Winsor Pilates basic principle, functions mentally within the body to calm the spirit. In this Winsor Pilates basic canon, a focus on the torso – abs, pelvic girdle, lower back, gluts – results to the improvement in a strong core and enables the rest of the body to function properly. All action with this Winsor Pilates basic principle performs from the trunk and flows outwards to the extremities. The fourth Winsor Pilates basic convention – Stabilizing – is important because in Winsor Pilates, before you move you have to be still for a safe starting place for kinesics. Breathing on the other hand, as the fifth Winsor Pilates basic principle, must range from deep, coordinated, conscious

Pilates And Complete Body Fitness

diaphragmatic procedures of inhales and exhales to initiate mobility and help in the activation of the muscles and to keep you focused. Furthermore, the sixth Winsor Pilates basic canon which is alignment is very essential because it is the key to good posture. With such Winsor Pilates basic principle, you will be conscious of the position of your neck on the spine and pelvis, right down through the legs and toes. In the seventh Winsor Pilates principle – Fluidity – a smooth, continuous motion rather than jazzy repetitions will create an elegant and graceful look. Lastly, the integration of all those Winsor Pilates basic principles will result to a holistic mind-body workout.

So with those above stated Winsor Pilates basic principles, I am sure that everyone will enjoy their adventure to a stronger and healthier looks.

Pilates also has his share of students, who continued his "teachings" his studio and his work. Nowadays, the modern day Pilates instructor, need only a certification, that they indeed have the proper training to supervise a safe and effective Pilates class. Pilates certifications are offered by a vast number of firms that aside from offering Pilates certifications also hold classes for practitioners.

A Pilates Certification course basically consists of the different basic techniques in the Pilates exercise, as well as good positioning, machine work and mat exercises.

The first Pilates certification course that would probably be taught in a typical Pilates Certification class is basic mat work exercises. These are beginner and intermediate level mat work classes after which, you will be certified to teach beginner or intermediate level Pilates Class. You won't need a machine for Pilates mat work, which make it the highest in demand because, if you're planning on teaching Pilates for a living, you can easily start on a low budget, and teach Pilates without using Machines.

The second topic in your Pilates certification course may probably be standing Pilates; this like mat Pilates doesn't need machines as well, but may take a bit more experience to learn because of the complicated position of standing upright, most Pilates certification schools do not teach standing Pilates until after the trainee has a certification in mat work Pilates.

After standing Pilates, is advanced mat work Pilates. The Pilates certification for advanced mat work, is given later because as its name says, it is advanced, meaning more difficult moves, which entails a higher probability of someone making a mistake. It is therefore crucial that the instructor to be is well trained before he gets an advanced mat work Pilates certification.

After the non equipment courses, the next course for Pilates certification would be the apparatus courses, where you'll be certified as an instructor for certain machines. First, the would-be instructor is trained with the basic Pilates equipment, Cadillac, reformer, circle, and barrels. After the course, you will have a Pilates certification for apparatus. Some schools offer standing apparatus Pilates certification, as a separate training program from basic apparatus training, if you want to learn it all at once, then you'll most likely find a certification firm that will accommodate you.

The last and probably the most complicated one is the training for people with special cases, like those with back, neck, knee, shoulder problems. These are more complicated situations and need more focus on. The only one that probably needs a better trained instructor would probably be Pilates for rehabilitation. Yes, Pilates can be used for rehabilitation, but to get a Pilates certification for rehabilitation, you must be certified in all the other Pilates techniques, this is because most people that need rehabilitation are fragile and therefore need extra care, as well as extra training.

After getting a Pilates certification for every course, the trainees should have the skills to teach the exercise techniques, as well as its Philosophical aspects to practitioners. Some schools even teach the trainees so that after they finish each course, they will also have enough skills to modify the exercise techniques to fit their class' needs, so that after you train, you can further improve on the techniques that we're taught to you and apply them as the case may be.

What You Need And What You Get From A Pilates Mat Exercise

You've probably heard of Pilates mat exercises, and have probably heard that it works great, or you probably heard that it sucks because it's so hard. Pilates mat exercises, are the bare basics of the Pilates exercise invented by Joseph Pilates in the Early 1910. First of all, your idea of Pilates must have included something with machines that have springs and bands, but Pilates can also be done without machines, just a simple mat, and this is called Pilates mat work, or simple Pilates mat.

Pilates Mat exercises have been considered very beneficial, especially for those who want stronger abdominal muscles and a stronger core. By core I mean the abs and the lower back. Pilates, as Joseph Pilates made it to be, is a low intensity groups of exercises that supposed to strengthen your muscles. Usually, exercises are done with Pilates machines, but Pilates Mat exercises however, have more challenging exercises simply because your body doesn't have to rely on the support of the machine to do the work, making it shoulder the work that you are making it do. These results in a variety of developments, more so, on the abs than any part of the body, and we all know that that piece of fat under the navel is really hard to get to.

The other benefit of a Pilates mat exercise is its sheer lack of exercise equipment. Unlike other Pilates exercises, this only requires you, as the name says, a Pilates mat. And you're ready to go, of course every Pilates exercise requires you some sort of instructor, either a real one, or a video, to tell you what to do, or if what you're doing is correct, which brings us to the question of do I really need an instructor? And the answer is yes, every exercise needs an instructor, even something you might think as simple as a Pilates mat exercise won't look very simple once you're in a hospital bed. Pilates mat exercises can be very advanced body work, and doing it wrongly can as with every type of work out, give you injuries. A Pilates mat instructor has to be certified by a qualified school make sure that your instructor has real qualifications before you take Pilates mat classes.

So when we touch the issue of a Pilates mat instructor, we ask what would be best. A DVD or a real one? Essentially, most Pilates experts recommend a real instructor, an instructor can point out what your doing wrong, can position you correctly if you don't have the right posture, and

Pilates And Complete Body Fitness

can personalize the exercise you're doing specifically for your body's needs. However, there are lots of Pilates mat exercise videos out there that have been getting good reviews recently. Some people might have gone on to saying that it's as good as the real instructor, well to each his own, but my suggestion is, if you can afford a real instructor, then get one. That's the problem with real instructors though, the price, you'll have to pay for classes monthly for that, but with a DVD, you'll only have to buy it once and then you can use it for years to come. What's also good with a Pilates mat exercise DVD is its convenience, you won't have to travel to the gym or to class you can just spread your mat on the floor, turn on the DVD and the you're good to go.

Basic Information On Pilates Rings

You've probably been hearing about "core" exercises and Pilates for quite a while and are probably doing it once to thrice a week, you've probably used different DVD's, different styles techniques and different equipment just to get that great body that everybody is drooling about. Hearing of all this, you've probably heard of the Ever present Pilates Ring, the non bulky, and cheaper alternative to all of those bulky machines.

The Pilates ring of course, as its name says, is used in the practice of Pilates, specifically for Winsor Pilates. Winsor Pilates makes use of low intensity workouts that work on the "core" of the body. By core it means the muscles in the abdomen, back and pelvis. As these are low intensity, these can be done even by those who are of weak health status. But just because it is low intensity doesn't mean it'll take a long time for results, or won't have results, in fact Winsor Pilates promise results in a month, when it is used three days a week. Winsor Pilates is distributed on DVDs.

A Pilates ring however, aside from being used to tone the buttocks and the abdominal and pelvic muscles can also be used to specifically target muscles in the leg, pecs, lats, triceps and biceps. It is an all around exercise accessory that everyone should have. To change position, you can reposition the ring in either your arms or your legs, whatever location it is that you want to tone and improve, and basically and squeezing it. But there is more to a Pilates ring than merely squeezing; anything done wrongly can cause injury, especially when exercising, so before you start, try to consult a certified Pilates instructor.

Pilates rings also have different brand names, and depending on the manufacturer, different resistances. Some manufacturers offer a line of different resistances; some offer just one line with one resistance. It is suggested that you get those that have varied resistances so that you're your body has been used and toned at a certain level; you can further increase your workout by increasing the resistance of the Pilates ring. Some rings have a stronger resistance for a harder workout; some have lighter resistance for a lighter workout. Just remember, make sure that you can take the resistance before rushing into it. Anything, no matter how foolproof can be dangerous if used incorrectly, in short, you might get injured if you use too much resistance. Again, try to consult a certified Pilates instructor before changing resistances.

Pilates rings, boast of foam padded grips for the comfort of the user, these are the parts that make actual contact with the part of the body, making the exercise more comfortable than if done without one. Pilates rings are made of lightweight material, and may be brought with you anywhere, to the gym or at home or during travel.

The Pilates ring is only one of the few accessories, or if you must, equipment that Winsor Pilates incorporates into its program for a better workout. However, you don't really need a Pilates program to be able to use a Pilates ring. Although the ring was made especially for this program, the Pilates ring itself can be incorporated into any other type of exercise program that you currently have, providing that you consult with your instructor.

The Good In Pilates Reformers

Pilates is a method of exercise invented by Joseph Pilates in the early 1910's. Joseph Pilates was a frail child, getting sick most of the time, he eventually got into exercising to improve his health. When he was detained in an English detention center for being an "enemy alien" in World War I, he used springs from hospital beds, for the resistance exercises that he used. It was these exact springs that inspired him to make the exercise machine that is now called the Pilates Reformer.

Joseph Pilates invented the Pilates technique of exercising to form a low intensity workout that is suitable for anyone in any condition. And indeed, Pilates has been successful both in the healthy and the slightly not well of population because of its low energy requirement. The Pilates reformer is just one of the many Pilates equipment that the technique employs and it is also the most popular of it all, with its simplicity and its economic size.

Essentially, doing Pilates Mat work would be the most ideal form of exercise that you can do, but reality wise, nobody can really do the demanding exercises of mat work without first experiencing less tiring methods; this is where the Pilates reformer comes in. But remember, it is really better to do Pilates of any form with an instructor. The Pilates instructor knows which part of the body to focus on, which exercise would benefit you most and which machine to really use.

But if you're hell bent on using the Pilates reformer, then to each his own, the truth is the reformer is one of the most effective equipment of all the Pilates machines. Just its name entails something that is a big claim on its own, "reformer" meaning something that reforms, and indeed it does, reform, reform your body.

The first basic exercise would have you, the exerciser lying face up on the carriage, as they call it. This is where the instructor comes in, he positions you to prevent strain on your body, and then you push your body, carriage and all, up and down or back and forth, depending on the type of Pilates Reformer that you are using.

The good thing about a Pilates reformer is that it doesn't even equal the leg presses that you usually do in a gym, it does something much more. The instructor guides you in order that you may maintain a neutral spine and pelvis, to prevent you straining them. And in addition you can even feel the movement come from your deep core muscles. Pilates aims to strengthen your core muscles, and this is just what a Pilates Reformer does. Aside from this you must relax your quads, hip flexors and knees, these are the mostly tired parts of your body, what with all the walking, the Pilates reformer and with the help of the instructor, helps these parts of your body relax more, and put the other parts, such as the back of your legs and your hips in a way that can absorb most of the strain instead of the knee.

The Pilates reformer exercise progresses into much higher intensity ones, once your instructor has given the go for the removal of the foot bar, to circling your legs and to more complex movements. This is for increased intensity, and this is also where things get complicated, that is why it is really important to have an instructor. As time goes, step by step all the mechanical support for your body are removed and your body will have to do more to compensate, this is what is good about a Pilates reformer, you only need one machine for increased intensity.

After every session, your body becomes stronger, your core harder, and with the Pilates reformer, you're sure to be able to do strengthen yourself more and do more challenging workouts for a very long time.

Pilates Videos Their Advantages

Pilates is an exercise technique invented by Joseph Pilates, a German National, who when he was arrested in France during the first world war for being an enemy alien, invented a low resistance type of exercises which was later coined after him, Pilates. Joseph Pilates First used springs from beds to make the first machine for Pilates. He alter moved to The United States and opened his own Studio. Ever since then Pilates was on its uphill climb, and now there are a variety of Pilates videos that teach you at home rather than at a studio.

First of all the advantage of any Pilates video is its adaptability. You can do it anywhere that has a DVD player and a television. Especially for those people who don't like going to the gym, the Pilates video is really in improvement for those that want to exercise in the comfort of their own home.

The disadvantages however, of a Pilates video are its lack of a tangible instructor. The instructions given on the DVD can hardly be enough of a substitute for an actual certified Pilates instructor. All the troubles all the questions and the probable injuries cannot all be covered by a single video, only a real instructor could do that.

So if you really want to do Pilates videos at home, it is advisable to first consult with an instructor, or probably take gym Pilates classes, just to orient yourself with the procedure, and then going on ahead to do it at home.

Winsor Pilates is one of the derivations of Pilates that has itself on video. This is a form of Pilates modified by Mari Winsor and claims to give results in 1 month, provided that you use it three times a week. Most people who have used it actually claim that it gives results in just two weeks.

Most people like Winsor Pilates, because, like other Pilates Videos it can be done in one's own home. In addition most people nowadays, even if they do, do Pilates at homes till don't have enough time to exercise. One satisfied user, after using it intermittently for 2 years, testifies to a healthier core, and higher body strength, although no weight loss was observable, provided his discontinuous usage, there we're still good results from its usage.

The other good thing about Pilates videos is that as you progress in using it and using it continuously, meaning you're not lazy, you tend to memorize all the routines as you go. So when you've memorized all the routines, you don't really have to strain your neck so much by looking at the TV. Another thing about Pilates videos is their economy, you won't have to pay monthly payments or gym memberships, all you need is the video and you can use it for as long as you want, or until you want to move on to another form.

Most Pilates exercises and Pilates videos are low intensity, you can't expect anything too strenuous or something that can be done for physical rehabilitation. For most people, low intensity workout for great results is already a great deal and would take it without so much as batting an eyelash, but for those muscle buffs who want a heavier workout, Pilates videos aren't for you.

A Look At Winsor Pilates

Winsor Pilates has gone all the rage in today's ever changing market for the best weight Loss programs, and so far, it has received good reviews both from users and professional analysts. But for someone, who just got introduced to this form of the ever famous exercise regimen, one cannot resist to ask, what is it? How can it help me?

Reviewers say that Winsor Pilates is best for weight loss, fat burning, mental conditioning, and like its namesake, it offers better health through exercise. Winsor Pilates comes in a DVD, and claims when used 3 days a week can produce results in as low as a month. This is a rather big claim considering the weight loss programs available to us today. But according to most users, Winsor Pilates, does work, with extra effects to boot.

Winsor Pilates is a low intensity exercise that burns a lot of calories, because it is low intensity, it can be done by almost anyone in almost any condition. Joseph Pilates, first invented the Pilates method, and focused on breathing and stretching in slow paced movements. Winsor Pilates is a derivation of the Pilates that Joseph Pilates invented, made by Mari Winsor. It aims to train the "core" or the muscles in the abdomen, back and buttocks. It says that by strengthening your core, you get aside from physical fitness, mental clarity which allows the mind to work efficiently with the body.

Mari Winsor, the inventor of Winsor Pilates is 54 years old, with the physique of a 20 year old. Due to the Winsor Pilates System, her body is lean and flexible, which we cannot say for a lot of people her age.

Mari Winsor made Winsor Pilates for the use of the majority. It makes use of the Pilates method, modified into a low intensity exercise which as said earlier can be done by most people, even in the frailest of health stature. This makes it accessible as well as useful for anyone, even people of poor health, thus improving their health without the fancy requirements of other methods.

Some people even say the Winsor Pilates can be used for rehabilitation, although this is true, it is hardly very easy for a person with broken bones to work out only in front of a DVD. If however, someone wants to use it for rehabilitation, it should be under the supervision of a

Pilates And Complete Body Fitness

certified Pilates instructor. This is because, for rehabilitation, Pilates has to be precisely observed, no amount of DVD's can replace an instructor, an instructor assures that you execute the moves correctly, and that you are not damaging or hurting yourself doing it, in addition, they are a good source of answers for most of the questions you'll have about Pilates. Plus it won't hurt to consult your doctor either, before using Pilates for rehabilitation.

For pregnant women however, Mari Winsor did not, modify the Pilates method to accommodate the pregnant women, so care must be taken. During the third trimester, Pilates done lying down should be avoided; this could damage the blood flow to the baby.

All in all, aside from pregnant women and extremely ill people, Winsor Pilates is for everyone. It provides an exercise that is easy on the joints muscles and bones. After the increased focus on abdominal muscles and all in one gyms Winsor is a definitely good replacement for methods that don't work.
